Wintriss Announces Flexible, Affordable Starting Packages for its ShopFloorConnect OEE, Production Tracking and Data Collection Software

ACTON, MA U.S.A. (October 29, 2024) – [Wintriss Controls Group](#) has added flexible and affordable purchase options for ShopFloorConnect® OEE, Production Tracking, and Data Collection software, which allows users to quickly and easily leverage data from their machines. ShopFloorConnect is an on-premises software solution that provides timely, accurate, and unbiased data directly from the shop floor for making informed management decisions.

Wintriss received a positive response when it debuted the new start-up purchase packages and options at FABTECH 2024. It will also be presenting the packages at [PACK EXPO 2024](#), Booth # LU-8431 McCormick Place, Chicago Illinois from November 3– 6 this year.

ShopFloorConnect is scalable and well-suited for manufacturers in a variety of industries, including metalforming and metal fabrication, machining, injection molding, discrete manufacturing, packaging, food, beverage, and more. The software provides valuable OEE calculations that accurately report overall equipment effectiveness for even the most complex manufacturing environments, and unlike cloud data solutions, customers fully own their data.

“We are excited to give customers more options to start using ShopFloorConnect, providing affordable ways for quickly gaining confidence and trust in its capabilities,” said Jim Finnerty, Product Manager, Wintriss Controls Group. “Taking advantage of the significant benefits of data collection and production monitoring is now easier than ever, and initial training is included with every new installation.”

ShopFloorConnect is available in three customizable purchase packages, depending on customer requirements for features, capabilities, and number of users. The range of starting packages includes two annual subscription-based packages -- “Lite” for up to 20 users and “Pro” which is multi-site capable with unlimited users. A full “Enterprise” purchase with a maintenance agreement is also offered for the most comprehensive setup.

All purchase options include ShopFloorConnect Equipment Summary and Performance Tracker functions. The Tool Tracker, Scheduler, Maintenance Tracker, and APIs are available in the Pro and Enterprise options. Reporting, Alerts, and External Displays are available in limited quantities in the Lite package and unlimited in Pro and Enterprise.

There are multiple hardware interface options for any ShopFloorConnect setup. Choose between any assortment of the SmartPAC 2 or SmartPAC PRO automation press controls, the ShopFloorConnect Machine Interface (SMI 2), and the **new** cost-efficient ShopFloorTracker device for your data collection needs.

For more details and information about starting with ShopFloorConnect, and to speak with Wintriss about your application requirements, visit <https://www.wintriss.com/sfc/pricing.html>.

About ShopFloorConnect® & Wintriss Controls Group

ShopFloorConnect is a shop floor data collection system from [Wintriss Controls Group](#) of Acton, MA. Wintriss has been manufacturing and installing electronic controllers on industrial machinery for over 60 years, developing its first downtime data collection and efficiency reporting software product in 1985, and continuously improving it ever since.

Wintriss has a unique skill set: Not only does the company provide a robust and scalable OEE reporting product and an on-machine production tracking solution that is simple to install and user friendly, its vast industrial controls experience enables the ability to seamlessly adapt the technology to customer machinery. For more information on ShopFloorConnect software and Wintriss, visit <https://www.wintriss.com/sfc/> or contact ShopFloorConnect - Wintriss Controls Group at 100 Discovery Way, Unit 110, Acton MA 01720, phone (800) 586-8324, Fax: (978) 263-2048.
