Job Description

Controls Programmer

Wintriss Controls Group - is seeking a highly technical individual to join our Automation Group. This person will be responsible for multiple aspects of the system integration design process including but not limited to PLC Programming, HMI Software design, electrical design, networking, onsite testing, and commissioning.

Responsibilities:

- Coordinate with project manager and design team to develop PLC program to meet the needs of the custom controls project.
- Design and document PLC work to meet customer requirements and deliver a finished product including offsite needs as they arise.
- Act as electrical designer on larger more complex projects as needed.
- Understanding and maintaining timelines between customers and internal team members.
- Validate electrical and hardware design specifications.
- Customer Site start-up and commissioning support as needed.
- Occasional onsite and phone troubleshooting and service as needed.

Required Technical Qualifications:

- PLC/HMI development environment.
 - Knowledge of Rockwell Automation preferred.
 - Knowledge of Siemens, Schneider, and Omron a plus
- AutoCAD
 - Electrical preferred
- Working knowledge of industrial level electrical theory along with basic electrical troubleshooting skills
- Control networks and industrial communication protocols such as Modbus and EtherNet/IP a plus

Additional Qualifications

- Travel Estimated at up to 25%. Some travel to Mexico and Canada will be necessary so ability to obtain a passport is a must.
- Ability to work both independently and in a team setting.
- Well organized and excellent written/verbal communications skills
- Team member should possess a willingness to listen, learn and ask questions to enhance their applied knowledge within the automation industry.

Experience and Education:

- 3+ years working in the controls industry.
- Automation/Electrical Engineering Technology or formal training equivalent

Personal Characteristics:

- Strong work ethic – responsible, dependable, and trustworthy
- Self-starter with high degree of intellectual curiosity, continuous improvement mindset and learning agility.
- Enjoy working both strategically and tactically by being hands on in managing, leading, driving and finishing tasks and projects.
- A team player who enjoys collaborating to solve problems and can be resourceful to find solutions, using a “can do” attitude.
